

**Eastman Chemical B.V. sent the following comments by e-mail on February 13<sup>th</sup> of 2020**

Dear madam/Sir,

Thank you for forwarding the draft advisory report related to terphenyl, hydrogenated.  
Please find our few comments below:

- Page 6, line 17-22: It is said that limited data on HH effect is available. This is incorrect. Moreover it should be noted that skin irritation is an effect; however studies in the Reach Dossier show the opposite on this endpoint.
- Page 24, line 1-2: in fact there are oral, dermal and inhalation acute tox studies available.

Kind regards,

**Jan Schüller** | Eastman
